**DOCUMENTATION:** 30 photographic views organized linearly, beginning at Massachusetts/Rhode Island State line, proceeding north to South Station in Boston. Sites are located according to section and milepost designations used by the railroad.

Similar aerial photographs were taken of railroad structures along the entire 456-mile route of the Northeast Corridor (NEC). Readers are advised to check NEC entries for the District of Columbia (HAER No. DC-3), Maryland (HAER No. MD-45), Delaware (HAER No. DE-21), Pennsylvania (HAER No. 71), New Jersey (HAER No. NJ-40), New York (HAER No. NY-121), Connecticut (HAER No. CT-11), and Rhode Island (HAER No. RI-19). See Field Records for HAER No. DC-3 for strip maps used during aerial reconnaissance and for other references.

**NOTE:** These photographs are U. S. Government materials and not subject to copyright. However, the courtesy of a credit line identifying the Historic American Engineering Record (HAER) and the photographer would be appreciated. All photographs were taken by Jack E. Boucher in April 1977.
